Meta Ads Strategy

Overall Approach

The advertising strategy for Yarn Charms was designed using a two-campaign funnel approach, where one campaign focuses on awareness and the other focuses on conversions. This ensures that potential customers are first introduced to the brand and then encouraged to take action.

Location Targeting

(Pakistan – Lahore, Karachi, Islamabad)

I selected these cities as they are the largest urban markets in Pakistan. They have high concentration of online shoppers and strong engagement in Instagram/Facebook commerce. Additionally, these cities have a growing trend of handmade, aesthetic, and customized gift culture, which aligns with Yarn Charms' products.

Target Audience Strategy

Age Group: 18–35

Gender: Both Male & Female

It was to increase reach to include gift purchasers (men buying for women/family).

Interest Targeting

- Crochet, Knitting, Handicrafts
- Cross stitch, Arts & Crafts
- Gift buyers, Online shoppers, Engaged shoppers
- Gift shops, Home décor interest
- Upcoming birthdays

Reasoning:

I targeted people who are actively purchasing gifts online, interested in handmade or aesthetic products, and are likely to buy.

Duration & Budget

Duration: 14 days

Budget: 2300 PKR

Reasoning:

A longer duration was selected because new arrival ads focus on visibility rather than immediate conversions and the slightly higher budget supports consistent reach and engagement over a longer period.

Carousel Format Usage

I used carousel format because it Increases user engagement through swiping behavior, and have higher chances of capturing attention
