Internship Duration

3 Weeks (12 June, 2026 _ June 26, 2026)

Business Case Study

Yarn Charms – Handmade Crochet Business

Executive Summary

This report presents the performance analysis and outcomes of a three-week Digital Marketing Internship project conducted for Yarn Charms, a handmade crochet business specializing in crochet flowers, keychains, Quran covers, coasters, custom orders, and crochet tutorials. The project was designed to apply digital marketing concepts in a real-world business environment through market research, content creation, campaign execution, email marketing, and performance analysis.

The **primary objectives** of the project were to increase brand awareness, improve audience engagement, and generate customer interest through strategic digital marketing activities. To achieve these goals, a structured content marketing strategy based on the **70/20/10 content rule** was implemented across Instagram and Facebook. The project also included the creation of a LinkedIn article, an email newsletter, mock advertising campaigns using Meta Ads Manager, and continuous documentation of progress through LinkedIn.

During the project period, significant improvements were observed across multiple performance indicators. Instagram followers increased from 55 to 85, representing a **growth rate of 54.5%**, significantly exceeding the initial target of 10–15%. Instagram views increased from 2,665 to 6,100, while **profile visits increased by 265%**. Facebook followers increased from 54 to 262, and platform views increased from 5,513 to 9,472. These results indicate **substantial improvements in brand visibility and audience reach**.

Content performance analysis revealed that educational content consistently outperformed direct promotional content. Tutorial-based and problem-solving content generated the highest reach, views, shares, saves, and interactions across both Instagram and Facebook. In particular, a reel demonstrating the use of a crochet Quran cover achieved the highest overall performance, **reaching 1,684 accounts and generating 1,991 views on Instagram**.

The project also resulted in measurable **business outcomes**. One customer inquiry regarding a crochet flower coaster product was received, and three custom product orders were generated during the

campaign period. These outcomes demonstrate that the content strategy **successfully generated customer interest** and contributed to business growth.

Additionally, a newsletter campaign was designed and distributed through **Mailchimp**. Despite operating with a limited subscriber list of six recipients and restricted analytics access under the free plan, the campaign achieved a **33.6% open rate with zero unsubscribes and zero bounce rate**, indicating positive audience reception and effective list management practices.

Overall, the project successfully **achieved and exceeded its SMART goals** while providing practical experience in content marketing, social media marketing, email marketing, audience analysis, brand storytelling, and digital campaign execution. The findings suggest that educational and value-driven content should remain the foundation of Yarn Charms' future marketing strategy, supported by continued investment in short-form video content and audience relationship building.

1. Project Objectives

The purpose of this internship project was to apply digital marketing knowledge and techniques to support the growth of Yarn Charms, a small handmade crochet business. The project focused on creating a structured digital marketing strategy that would increase visibility, improve engagement, and strengthen customer interest.

The following **SMART goals** were established at the beginning of the project:

Goal 1: Brand Awareness

Increase Instagram follower count by **10–15%** during the three-week project period through the publication of five high-quality social media posts and two reels.

Goal 2: Audience Engagement

Improve engagement on Facebook and Instagram by encouraging interactions through educational content, product showcases, tutorials,

and audience-focused posts designed to generate likes, comments, shares, saves, and profile visits.

Goal 3: Business Growth

Increase visibility and customer interest by consistently promoting crochet products and tutorials while monitoring profile visits, inquiries, and custom order requests as indicators of business growth and audience interest.

These objectives were designed to **align with the business needs** of Yarn Charms while also providing practical opportunities to apply digital marketing strategies within a real-world environment.

2. Methodology & Strategy

Business Overview

Yarn Charms is a handmade crochet business that offers crochet flowers, keychains, Quran covers, coasters, custom crochet products, and crochet tutorials. The business primarily operates through **social media platforms**, using visual content to showcase handmade craftsmanship and connect with potential customers.

The business possesses several **strengths**, including strong visual appeal, product customization options, and the ability to serve both customers and crochet enthusiasts through educational content. However, **challenges** such as limited brand awareness, a small audience base, and the constraints of handmade production create barriers to rapid growth.

To address these challenges, a **structured digital marketing strategy** was developed to improve visibility, engagement, and customer interest.

Strategic Framework

The content strategy was developed using the 70/20/10 content marketing model:

70% Educational Content

Educational content was designed to provide value to the audience by answering questions, demonstrating product usage, sharing crochet knowledge, and solving common customer concerns.

Examples included:

- Crochet FAQs
- Product usage demonstrations
- Crochet tutorials
- Informative reels

20% Engagement Content

Engagement-focused content encouraged audience participation and interaction.

Examples included:

- Poll-style posts
- Preference-based questions
- "This or That" content
- Audience discussion prompts

10% Promotional Content

Promotional content was used to showcase products and encourage inquiries or purchases.

Examples included:

- Product displays
- Product benefits
- Call-to-action posts
- New product promotions

This balanced strategy ensured that the audience received value-driven content rather than continuous sales-focused messaging.

Target Audience

The primary audience for Yarn Charms consisted of:

- Individuals interested in handmade products
- Gift buyers
- Crochet enthusiasts
- Home décor enthusiasts
- Young adults aged 18–35
- Social media users seeking aesthetic and personalized products

Special consideration was given to audiences interested in customized gifts and religious accessories such as crochet Qur'an covers.

Tools and Platforms Used

The project utilized a variety of professional digital marketing tools throughout the campaign lifecycle.

Research and Planning

- Google Search
- Pinterest
- Instagram & Facebook

Content Creation

- LinkedIn Article Publishing Tool

Project Management & Documentation

- Github
- Google Drive

- WPS Office Suite

The use of these tools enabled campaign planning, content development, analytics tracking, email marketing execution, and professional reporting.

3. SWOT Analysis and Strategic Planning

A SWOT Analysis was conducted to evaluate Yarn Charms' current market position and identify opportunities for growth.

Strengths

Yarn Charms benefits from highly visual products that naturally perform well on image-focused social media platforms. The business also offers customization options, allowing customers to request unique products tailored to their preferences. In addition, the **combination of physical products and educational crochet content** broadens audience appeal.

Weaknesses

As a handmade business, production capacity is limited by the time required to create each item. **Brand awareness remains relatively low** due to a small audience base, and pricing can be challenging because handmade products require significant labor and material investment.

Opportunities

The growing popularity of handmade products, personalized gifting, and short-form video content presents significant opportunities for business growth. Seasonal events such as Eid, Mother's Day, and wedding seasons provide **additional demand for customized gifts and decorative products.**

Threats

Competition from other handmade businesses continues to increase across social media platforms. Rising material costs can affect profitability, while changes in platform algorithms may impact organic reach and content visibility.

Strategic Application

The SWOT analysis directly influenced content strategy decisions. **Educational content was prioritized to build trust and authority,** while

reels were utilized to capitalize on opportunities for increased organic reach. Product customization was highlighted throughout the campaign to leverage one of the business's strongest competitive advantages.

4. Social Media Performance Analysis

Metric	Before Internship	After Internship	Change
IG Followers	55	85	+54.5%
IG Views	2665	6,100	+128.9%
IG Profile Visits	Baseline	+265%	Increased
FB Followers	54	262	+208 Followers
FB Views	5513	9,472	+71.8%
Newsletter Subscribers	0	6	+6
Customer Inquiries	0	1	+1
Custom Orders	0	3	+3

*Overall campaign performance indicates that **all three SMART goals were achieved or exceeded**. Significant growth was observed in audience reach, follower acquisition, profile visits, customer inquiries, and custom order requests.*

Content Execution Overview

During the internship period, the planned content calendar was successfully executed across Instagram and Facebook.

Content published included:

- 5 Social Media Posts
- 2 Reels
- Cross-platform distribution on Instagram and Facebook

The posting schedule maintained a consistent rhythm, with content typically **published every two days to sustain audience engagement and platform activity.**

Instagram Performance

➤ Audience Growth

Starting Followers: 55

Current Followers: 85

Follower Growth: +30 followers

Percentage Growth: 54.5%

The follower growth significantly **exceeded the original SMART goal** of increasing followers by 10–15%.

➤ Visibility Performance

Starting Views: 2,665

Current Views: 6,100

Growth in Views: 128.9%

Profile Visits: Increased by 265%

These results indicate a substantial increase in brand visibility and audience interest during the campaign period.

Figure 1: Demonstrates the performance of Instagram Insights during the internship period

➤ **Best Performing Instagram Content**

1. Reel 2 – Crochet Quran Cover Demonstration

Performance Results:

- Reach: 1,684
- Views: 1,991
- Interactions: 59
- Saves: 12
- Followers Gained: 5

This reel significantly outperformed all other content published during the project.

Several factors contributed to its success:

- Educational value
- Product demonstration
- Clear visual instructions
- Minimal distractions
- Relevant background audio
- Strong call-to-action

The content showed viewers how to properly use a crochet Quran cover, transforming the post from a product advertisement into a useful educational resource.

2. Post 1 – Crochet Flower Coaster Carousel

Performance Results:

- Highest performing static post
- Strong engagement and interactions
- Generated a direct customer inquiry regarding product pricing

This carousel used **strategic copywriting techniques** to identify a customer need before presenting the product as a solution. The opening slide featured attention-grabbing text and visually appealing product presentation, while the final slide included a direct call-to-action encouraging purchases.

The content successfully moved beyond engagement and generated genuine purchase consideration.

Facebook Performance

➤ Audience Growth

Starting Followers: 54

Current Followers: 262

Net Follower Growth: +208 Followers

This represents substantial growth during the internship period and demonstrates that the content strategy successfully expanded the reach of Yarn Charms beyond its existing audience.

➤ Visibility Performance

Starting Views: 5,513

Current Views: 9,472

View Growth: +71.8%

The increase in platform views indicates **improved content discoverability and stronger audience exposure** throughout the campaign period.

Figure 2: Demonstrates the performance of Facebook Analytics during the internship period

➤ **Best Performing Facebook Content**

1. Reel 2 – Crochet Quran Cover Demonstration

Performance Results:

- Highest performing reel
- 126 views
- Strongest sharing rate among all content

The educational nature of the reel encouraged viewers to share the content with others, extending its reach beyond existing followers. This reinforces the finding that useful, **informative content generates stronger audience response than direct promotional material.**

2. Post 3 – Crochet FAQ Content

Performance Results:

- Most viewed Facebook post
- 111+ views
- Strong audience interest

This post focused on answering frequently asked questions about crochet products. By addressing common customer concerns, the content reduced uncertainty and **provided immediate value to viewers.**

The success of this post suggests that **educational content serves as an effective trust-building mechanism** within the handmade products market.

3. Post 4 – Engagement-Based Content

Performance Results:

- Highest engagement among Facebook posts
- 17 interactions

This content used a simple "This or That" format, presenting users with two options and encouraging them to share their preferences.

The post successfully generated audience participation because it required minimal effort while creating an opportunity for personal expression.

✓ **Comparative Performance Findings**

Analysis across both Instagram and Facebook revealed a consistent pattern:

Reels Outperformed Static Posts

Reels generated:

- Higher reach
- More views
- More interactions
- Better follower growth
- Increased content sharing

This performance **aligns with current social media platform algorithms**, which prioritize short-form video content due to its ability to retain audience attention.

Educational Content Outperformed Promotional Content

The strongest performing content categories included:

- Product demonstrations
- Tutorials
- Frequently Asked Questions
- Educational explanations

The audience consistently **responded more positively to content that provided solutions, knowledge, or practical value.**

This finding **validates the 70/20/10 content strategy** implemented during the campaign.

✓ **Business Impact**

Beyond engagement metrics, social media activity generated measurable business outcomes.

Customer Inquiry

One customer contacted Yarn Charms after viewing the Crochet Flower Coaster content and requested pricing information.

This demonstrates successful movement through the marketing funnel:

Content Exposure → Audience Interest → Customer Inquiry

Custom Orders

Three custom orders were received during the internship period.

Notably, these requests involved products that were not currently listed on the business profile.

This indicates:

- Increased trust in the brand
- Growing audience awareness
- Strong interest in customized crochet products
- Successful positioning of Yarn Charms as a personalized handmade business

Although direct sales tracking was unavailable, these inquiries and orders serve as important indicators of business growth and customer intent.

5. LinkedIn Content Marketing Analysis

Content Strategy

LinkedIn served as a professional *documentation platform* throughout the internship.

A total of **nine LinkedIn posts** were created to document project progress, share learning experiences, discuss challenges, and showcase completed deliverables.

The content strategy focused on:

- Professional storytelling
- Project transparency
- Skill demonstration
- Knowledge sharing
- Personal branding

This approach transformed internship activities into professional portfolio content while simultaneously strengthening professional visibility.

LinkedIn Performance

Overall Performance

Last 7 Days:

- 403 impressions
- 151 members reached
- 11 engagements

Follower Growth:

- Total Followers: 569
- **Growth Rate: 7%**

Top Performing Posts

1. Article Promotion Post

Performance:

203 impressions

This post generated the highest visibility among all LinkedIn updates and demonstrated strong audience interest in long-form content.

2. Week 2 Update (Part 2)

Performance:

50 impressions

This update performed well because it provided **authentic insights into the internship process** and highlighted practical learning experiences.

Figure 3: Demonstrates the performance of LinkedIn posts published during the internship period

LinkedIn Article Analysis

Article Title

Why Crochet Gifts Hold More Value Than Retail Luxury

Objective

The primary objective of the article was to establish Yarn Charms as a value-driven handmade brand while educating readers about the advantages of handcrafted products.

The article aimed to address a common challenge faced by artisan businesses:

Consumers often compare handmade products with mass-produced alternatives based solely on price.

To overcome this challenge, the article was designed to **reposition crochet products as meaningful investments** rather than simple purchases.

Why This Topic Was Chosen

The topic was selected because it aligns directly with the core value proposition of Yarn Charms.

Instead of competing with factory-made products on cost, the article highlighted:

- Emotional value

- Craftsmanship
- Personalization
- Longevity
- Meaningful gifting

The article encouraged readers to view handmade crochet gifts as products with lasting sentimental and practical value.

This positioning supports **premium brand perception** and helps justify the labor-intensive nature of handmade production.

Editorial and Content Marketing Strategy

Several content marketing techniques were intentionally incorporated into the article.

➤ **Storytelling Approach**

The article emphasized emotions, memories, and personal connection rather than product specifications.

This storytelling approach helps readers form stronger psychological connections with the brand.

➤ **Emotional and Economic Balance**

A deliberate effort was made to balance emotional and practical arguments.

Readers were shown that handmade crochet products provide:

- Sentimental value
- Personal meaning
- Long-term usability
- Economic value through durability

This balanced messaging appeals to both emotional and rational decision-making processes.

➤ **Accessibility Optimization**

Alternative text (Alt Text) was added to all visual content.

This improves accessibility for screen-reader users and demonstrates awareness of inclusive digital marketing practices.

➤ **Readability Enhancement**

The article utilized:

- Short paragraphs
- Headings
- Bullet points
- Bold formatting

These techniques improve readability and support mobile-first content consumption behavior.

Tools Used

The article development process utilized:

- WPS Writer
- LinkedIn Article Publishing Tool
- Google Search
- Canva
- Pinterest

These tools supported research, content creation, editing, formatting, and publication.

Article Results

Performance Metrics:

- 200 impressions
- 116 members reached
- 4 article views
- 6 engagements
- 4 reactions
- 2 comments
- 2 profile views
- 1 follower gained

For a niche handmade business topic and a developing LinkedIn presence, these results demonstrate **positive audience engagement and visibility.**

6. Email Marketing Campaign Analysis

Campaign Overview

As part of the digital marketing strategy, an email marketing campaign was developed and distributed using **Mailchimp**. The objective of the campaign was not immediate sales generation, but rather to establish brand awareness, communicate the value of handmade crochet products, and begin building a direct communication channel with potential customers.

The campaign was published as the first edition of the Yarn Charms newsletter and served as an introduction to the brand, its products, and its unique value proposition.

Campaign Objectives

The email campaign was designed to achieve the following objectives:

- Increase awareness of Yarn Charms products and services.
- Build trust through storytelling and educational content.
- Showcase the variety of products available.
- Introduce subscribers to custom order opportunities.

- Establish a foundation for future email marketing activities.

Unlike traditional promotional emails that focus heavily on sales, this campaign prioritized relationship building and long-term customer engagement.

Why This Topic Was Chosen

The newsletter was intentionally built around the **concept of handmade craftsmanship** rather than direct product promotion.

The handmade products market is **highly emotional in nature**.

Customers purchasing crochet gifts are often seeking meaningful, personalized items rather than simply comparing prices.

For this reason, the newsletter focused on:

- The value of handmade craftsmanship.
- The time and care invested in creating products.
- The uniqueness of each item.
- The emotional connection associated with gifting handmade products.

This approach supports long-term brand equity and encourages customer trust before introducing sales-focused messaging.

Campaign Structure and Content Strategy

The newsletter followed a strategic content hierarchy designed to guide readers through a logical customer journey.

➤ **Brand Introduction**

The opening section welcomed readers and introduced Yarn Charms as a handmade crochet business focused on quality, creativity, and personalization.

➤ **Product Showcases**

Products were strategically grouped according to accessibility and customer intent.

➤ **Entry-Level Products**

Products such as keychains and coasters were positioned as affordable and practical options suitable for first-time customers.

➤ **Specialized Products**

Crochet Quran covers were highlighted as meaningful and functional products serving a specific audience segment.

➤ **Premium Products**

Crochet flower bouquets and custom orders were positioned as premium offerings with strong emotional value and long-term appeal.

➤ **Call-to-Action Strategy**

The newsletter concluded with a direct invitation for custom orders and customer inquiries.

This placement ensured that trust and value were established before asking readers to take action.

Technical Implementation

The newsletter was developed using Mailchimp and incorporated several professional email marketing practices.

➤ **Visual Asset Optimization**

Images were carefully selected and organized to maintain consistency and create a professional appearance.

➤ **Accessibility Enhancements**

Alternative text was added to all visual elements to improve accessibility for users relying on screen readers.

➤ **Customer Journey Integration**

Call-to-action buttons and contact methods were connected directly to Yarn Charms' communication channels, simplifying the inquiry process.

➤ **Audience Management**

A clean subscriber list was prepared and uploaded into Mailchimp to ensure proper campaign delivery.

Campaign Results

Recipients: 6

Open Rate: 33.6%

Total Opens: 2

Click Rate: 0%
Bounce Rate: 0%
Unsubscribe Rate: 0%

Figure 5: Presents the performance metrics of the Yarn Charms Newsletter campaign distributed through Mailchimp.

Performance Evaluation

The campaign achieved a **positive open rate** despite the small subscriber base.

The absence of unsubscribes suggests that the content was relevant and well-received by recipients.

The zero bounce rate indicates proper audience list management and successful email delivery.

The lack of link clicks suggests an opportunity for future optimization through stronger call-to-action placement and more compelling offers.

Future Opportunities

Future email marketing initiatives could include:

- Expanding the subscriber database.
- Introducing lead magnets.
- Testing different subject lines.
- Implementing A/B testing.

- Creating seasonal promotional campaigns.
- Segmenting audiences based on interests and purchasing behavior.

These improvements would enable more advanced performance tracking and campaign optimization.

7. Mock Advertising Campaign Analysis

Advertising Objective

Due to budget limitations, live advertising campaigns could not be launched during the internship period. However, two complete advertising campaigns were designed using **Meta Ads Manager** to demonstrate strategic planning and audience targeting capabilities.

The purpose of these campaigns was to simulate real-world advertising scenarios and develop practical experience with campaign creation, audience segmentation, budgeting, and performance forecasting.

Tools Used

- Meta Ads Manager
- Meta Business Suite
- Canva
- Facebook Audience Research
- Instagram Insights
- Facebook Insights

Campaign Funnel Strategy

Both campaigns were developed using a **two-stage marketing funnel approach**.

➤ Awareness Campaign

The first campaign focused on introducing Yarn Charms to new audiences and generating brand awareness.

➤ Conversion Campaign

The second campaign focused on encouraging purchase intent and customer action after initial brand exposure.

This structure follows standard digital marketing practices where awareness is built before conversion efforts are introduced.

Campaign 1 Analysis

Figure 6: Awareness Campaign Mock Ad

Objective

Brand Awareness

Target Locations

- Lahore
- Karachi
- Islamabad

These locations were selected due to their large populations, strong e-commerce activity, and growing interest in personalized gifts and handmade products.

Audience Profile

➤ Age Range:

18–35

➤ Primary Gender:

Women

➤ Interest Targeting

Crochet

Knitting

Handicrafts

DIY
Arts and Crafts
Handmade Products
Hobby Learning Enthusiasts

➤ **Budget**

PKR 2,200

➤ **Duration**

8 Days

➤ **Creative Format**

Carousel Advertisement

➤ **Strategic Rationale**

Women between 18 and 35 represent a **highly relevant audience** segment for handmade crochet products. Carousel ads were selected because they **encourage user interaction** through swiping behavior and allow multiple products to be showcased within a single advertisement.

Campaign 2 Analysis

Figure 7: Conversion Campaign Mock Ad

Objective

Conversions and Product Discovery

Target Locations

- Lahore
- Karachi
- Islamabad

Audience Profile

➤ **Age Range:**

18–35

➤ **Gender:**

Male and Female

➤ **Interest Targeting**

Crochet

Handicrafts

Arts and Crafts

Online Shopping

Gift Buyers

Home Décor

Engaged Shoppers

Upcoming Birthdays

➤ **Budget**

PKR 2,300

➤ **Duration**

14 Days

➤ **Creative Format**

Carousel Advertisement

➤ **Strategic Rationale**

This campaign expanded targeting beyond traditional crochet audiences and focused on individuals likely to purchase gifts or personalized products.

Including male audiences allowed the campaign to reach gift purchasers who may buy products for family members, friends, or partners.

Future Advertising Recommendations

If advertising budgets become available in the future, the following approach is recommended:

➤ **Phase 1:**

Educational reels designed to generate awareness and audience engagement.

➤ **Phase 2:**

Retargeting campaigns directed at users who engaged with awareness content.

➤ **Phase 3:**

Conversion-focused campaigns highlighting custom orders and premium crochet products.

This funnel would improve advertising efficiency while reducing customer acquisition costs.

8. Challenges, Optimization, and Problem Solving

Throughout the internship, several practical challenges were encountered during campaign execution. Rather than preventing project completion, these challenges provided opportunities to develop problem-solving skills and adapt marketing strategies to real-world limitations.

Challenge 1: Meta Business Suite Scheduling Issues

The original content plan involved scheduling posts through Meta Business Suite to maintain a consistent publishing schedule across Facebook and Instagram.

However, technical issues prevented the scheduling feature from functioning properly on both desktop and mobile devices. As a result, content could not be automated as originally planned.

Solution Implemented

To ensure the content calendar remained on track, all content was manually published according to the planned schedule.

This solution required additional time management and monitoring but allowed the campaign to proceed without disruption.

Learning Outcome

Digital marketers must remain flexible and prepared to adapt when platform tools fail. Successful campaign execution depends not only on planning but also on the **ability to implement alternative solutions** when technical limitations arise.

Challenge 2: Limited Email Marketing Analytics

The free version of Mailchimp provided only basic campaign reporting functionality. Advanced analytics such as detailed click maps, audience segmentation reports, and behavioral tracking were unavailable.

Solution Implemented

Performance evaluation focused on available metrics, including:

- Open Rate
- Bounce Rate
- Unsubscribe Rate
- Delivery Success

Additionally, campaign success was assessed through **qualitative indicators** such as content quality, audience engagement, and newsletter structure.

Learning Outcome

Even when advanced data is unavailable, marketers can still evaluate campaign effectiveness using available metrics and strategic analysis.

Challenge 3: Small Subscriber Base

The newsletter campaign was distributed to only six recipients, limiting overall campaign reach and statistical significance.

Solution Implemented

The campaign was treated as a **foundational email marketing initiative** focused on building infrastructure rather than maximizing reach.

The primary objective shifted toward learning platform functionality, testing newsletter design, and establishing future scalability.

Learning Outcome

Building a successful email marketing channel requires long-term audience growth. **Subscriber acquisition** should become a future marketing priority.

Challenge 4: Advertising Budget Constraints

Although advertising campaigns were designed during the internship, budget limitations prevented live campaign deployment and testing.

Solution Implemented

Complete mock advertising campaigns were developed using **Meta Ads Manager** to demonstrate audience targeting, budgeting, placement selection, and campaign strategy development.

Learning Outcome

Campaign planning remains a valuable digital marketing skill even when budgets prevent immediate execution.

9. Key Findings and Strategic Insights

Analysis of campaign performance produced several important findings regarding audience behavior, content effectiveness, and future marketing opportunities.

Finding 1: Educational Content Generates Higher Engagement

The strongest-performing content across both Instagram and Facebook was educational in nature.

Examples include:

- Crochet Quran Cover Tutorial Reel
- Crochet FAQ Post
- Product Demonstration Content

These posts consistently generated:

- Higher reach
- More views
- Increased saves
- Increased shares
- Stronger audience engagement

Strategic Insight

Audiences are more likely to engage with content that **provides practical value rather than direct sales messages.**

Educational content establishes trust, demonstrates expertise, and encourages repeat engagement.

Finding 2: Reels Significantly Outperform Static Posts

Short-form video content consistently achieved greater visibility and audience interaction compared to static image posts.

The highest-performing content during the internship was Reel 2, which generated:

- 1,991 Instagram views
- 1,684 reach
- 59 interactions
- 12 saves
- 5 new followers

Strategic Insight

Short-form video content should become a central component of future content strategies due to its ability to reach new audiences and improve discoverability.

Finding 3: Problem-Solving Content Drives Interest

Content that addressed customer questions or demonstrated product usage performed significantly better than traditional product showcases.

Examples include:

- Crochet FAQs
- Quran Cover Demonstration
- Educational Crochet Content

Strategic Insight

Customers often seek information before making purchase decisions. Educational content reduces uncertainty and strengthens purchasing confidence.

Finding 4: Customer Interest Extended Beyond Existing Products

Three custom orders were received during the internship period for products not currently displayed on Yarn Charms' social media profiles.

Strategic Insight

Customers recognize Yarn Charms as a custom crochet provider rather than solely a seller of displayed products. This creates opportunities to expand custom-order marketing efforts.

Finding 5: Content Generated Real Business Interest

One customer inquiry regarding crochet flower coasters was generated directly through campaign content.

Strategic Insight

The marketing strategy successfully moved audiences beyond awareness and engagement into the consideration stage of the customer journey.

10. Recommendations and Future Outlook

Based on campaign performance and audience behavior, several recommendations can be made for the future growth of Yarn Charms.

Recommendation 1: Increase Educational Content Production

Educational content consistently delivered the strongest performance throughout the project.

Future content should include:

- Crochet tutorials
- Product usage demonstrations
- Frequently Asked Questions
- Care and maintenance tips
- Crochet-related educational content

Maintaining the **70/20/10 content strategy** is recommended because campaign results validated its effectiveness.

Recommendation 2: Prioritize Reels

Since reels generated the highest reach and engagement, future content calendars should include a greater proportion of video-based content.

Recommended Frequency:

- 3–4 reels per week
- 2–3 static posts per week

This approach would maximize organic reach while maintaining content variety.

Recommendation 3: Expand Email Marketing Activities

The newsletter campaign established a strong foundation for future email marketing.

Future improvements should include:

- Subscriber growth campaigns
- Lead magnets
- Exclusive promotions
- Seasonal campaigns
- Audience segmentation

A larger subscriber base would improve campaign reach and provide more meaningful performance data.

Recommendation 4: Launch Paid Advertising Campaigns

When budgets become available, Yarn Charms should implement the advertising framework developed during this internship.

The recommended advertising funnel includes:

Stage 1:

Awareness-focused educational reels

Stage 2:

Retargeting campaigns for engaged users

Stage 3:

Conversion campaigns focused on custom orders and premium products

This approach would improve advertising efficiency and **maximize return on investment**.

Recommendation 5: Leverage Custom Orders

The custom order inquiries received during the project demonstrate strong market interest in personalized crochet products.

Future content should actively promote:

- Custom color selections
- Personalized designs
- Made-to-order products
- Customer request showcases

This strategy can increase perceived value and improve profitability.

Future Outlook

The performance results achieved during this internship indicate strong growth potential for Yarn Charms.

The combination of increasing follower counts, rising content visibility, customer inquiries, and custom order requests demonstrates that the business has established a solid foundation for future expansion.

By continuing to prioritize educational content, short-form video marketing, customer relationships, and personalized products, Yarn Charms can further strengthen its online presence and build a sustainable customer community.

11. Conclusion

In this Digital Marketing Internship project, I successfully applied digital marketing principles within a real-world business environment using Yarn Charms as a case study.

The project achieved and exceeded its primary objectives of increasing brand awareness, improving audience engagement, and generating customer interest. Instagram **followers increased by 54.5%**, Facebook followers increased substantially, content visibility improved across both platforms, and measurable business outcomes were achieved through customer inquiries and custom order requests.

The implementation of a **structured 70/20/10 content strategy** proved effective in balancing educational, engagement-focused, and promotional content. **Performance analysis** revealed that educational content and short-form video formats consistently generated the strongest audience response, providing valuable insights for future marketing efforts.

The project also provided practical experience in content marketing, social media management, email marketing, audience analysis, advertising strategy, and performance evaluation. The challenges related to platform limitations, analytics restrictions, and budget constraints were successfully addressed through adaptability and strategic problem-solving.

Overall, the internship provided valuable hands-on experience while contributing meaningful growth and visibility to Yarn Charms. The findings and recommendations presented in this report establish a clear roadmap for future marketing activities and **demonstrate the effectiveness of customer-focused, value-driven digital marketing strategies.**
